

NEWS RELEASE

For Immediate Release

Quatech to Showcase 802.11b/g Wireless Technology at M2M United Conference June 23-26

HUDSON, OHIO – June 19, 2008 – [Quatech, Inc.](http://www.quatech.com), a leader in wireless machine-to-machine (M2M) networking and device connectivity solutions, today announced that it will be an exhibitor at the M2M United Conference 2008, June 23-26 in Wheeling, Illinois.

Quatech offers the broadest line of wireless device networking solutions for both external and embedded M2M applications. Quatech's Airborne™ wireless line enables M2M communications using 802.11 wireless networks through embedded radios, modules, boards and external device servers. With advanced 802.11g radio technology, Quatech's Airborne Industrial Wireless Device Servers optimize overall enterprise network efficiency by streamlining communications across external and embedded wireless-enabled applications.

The fourth annual M2M United Conference will bring together developers, adopters and analysts in an education and networking atmosphere. M2M United is an exclusive industry event that promotes the development, awareness and business value of machine-to-machine technology and the surrounding industries.

Featuring three track sessions highlighting the technology, operations and business segments, the M2M United identifies the critical issues related to machine-to-machine technology. With topics selected by chaired analysts and industry players, the sessions will identify the most crucial ideas for promoting M2M adoption and significant advantages to clients in industries such as smart services, manufacturing and retail.

Quatech will showcase 802.11b/g Airborne™ products; and discuss the most recent Quatech news topics including:

- The Expansion of Quatech's Embedded 802.11 Radio lines for the M2M Market to Include SDIO/SPI Interface Radios
- The 802.11b/g Radio Upgrade to Airborne Industrial Wireless Device Servers
- Quatech's DPAC Technologies Awarded Top 100 Recognition by M2M Magazine
- The Celebration of Quatech's 25 Years of Customer-Driven Innovation

Quatech representatives will be available to discuss and demonstrate 802.11 technologies and explain the integration of Quatech products into M2M applications June 23-25 at the Westin Chicago North Shore in booth #203. On Tuesday June 24, Quatech Director of OEM Sales, Mo Kapila will be participating in a panel discussion, Embedded M2M: Beyond Cellular. For more information on Quatech, visit www.Quatech.com.

About Quatech, Inc.

Quatech delivers high performance device networking and connectivity solutions to help companies improve their bottom line results. Its products enable reliable machine-to-machine (M2M) communications via secure 802.11 wireless or traditional wired networks, with industrial-grade embedded radios, modules, boards and external device servers, and bridges. For local and mobile connections, Quatech's serial adapters provide secure connectivity and port expansion via any interface option.

Satisfied customers worldwide rely on Quatech's unique combination of performance and support to improve operations through real-time remote monitoring and control, streamlined systems, and lowest total cost of ownership (TCO). Quatech markets its products through a global network of distributors, resellers, systems integrators and original equipment manufacturers in the transportation, instrumentation and industrial control, homeland security, medical equipment, and logistics markets. Founded in 1983, Quatech is headquartered in Hudson, Ohio. Quatech merged with DPAC Technologies (OTCBB: [DPAC](http://www.dpac.com)) in February 2006. Information concerning DPAC is filed by DPAC with the SEC and is available on the SEC website, www.sec.gov. To learn more about Quatech's complete line of device networking and connectivity solutions, visit www.quatech.com.
